

London Borough Data Partnership Meeting #3

City Hall

22 May 2015

9:30 – 12:00, Committee Room 1

Agenda

9.30 Welcome & Introduction

Andrew Collinge, Assistant Director of GLA Intelligence Unit

9.35 Andrew Collinge

GLA data activity: 2050 Infrastructure Plan/Innovate UK and more!

9.50 Lola Fernandez-Redondo, Digital Greenwich

Horizon 2020 European Commission bid and Greenwich data-led initiatives.

10.10 Lawrence Hopper, Open Data Policy Manager, Cabinet Office

The NII: a national open set of data that describes the society we live in.

10.30 break

10.40 Alan Lewis, GLA Intelligence Unit

Everyone loves a sharer! What data should we share and why?

11.20 Stephen Blackburn, Leeds City Council

Leeds Datamill: challenges and proving its value

11.40 Paul Hodgson, GLA GIS Manager

MyLondon: a preview of our brand new web app built on the London Datastore.

12.00 Close

Introduction to **DigitalGreenwich**

RBG/GLA Collaboration

Enhancing & helping to develop the London Datastore

- Energy-efficient cities
- Digital Clusters

Mission

To position the Royal Borough of **Greenwich** as a leader in **Smart City Innovation**, and to support the *economic, social and spatial Regeneration* of the Borough.

To help the Royal Borough of Greenwich **address the challenges** of accommodating significant **growth**:

- Increasing & ageing population,
- businesses and visitors,
- increased demand for services,
- minimise the impact on physical, natural and financial resources.

Vision: Citizen-Centric

RBG's Vision: ***Citizen Centric*** and ***Forward Looking***

Resilient, Resource-Efficient, Responsive Borough where:

- **All citizens** are **key engaged stakeholders**.
- **Businesses** are **partners** in the growth and well being of the community
- **The Local Authority** becomes the key “facilitator” of the smart city vision.

Digital Infrastructure

Transform Public Services:

Transform Neighbourhoods:

Smart Council

**Royal
Borough of Greenwich**
Vision/Leadership
Digital Greenwich

Business Growth

Transform Skills:

Transform the Greenwich Economy:

Skills

Smarter & more Meaningful USE of City's DATA

More **Resilient, Smart, Inclusive and Resource-Efficient Cities**

Objectives:

- Allow **Citizens** to take **informed decisions**
- Assist **City Managers** in their decision-making processes
- Provide the **Business Community** with new Opportunities for Market Development

RBG/GLA Collaboration around:

- **Capture real-time city DATA**
- **Integrate & Display it in the London Datastore – Open data**

Enhancing the London Datastore – Project 1

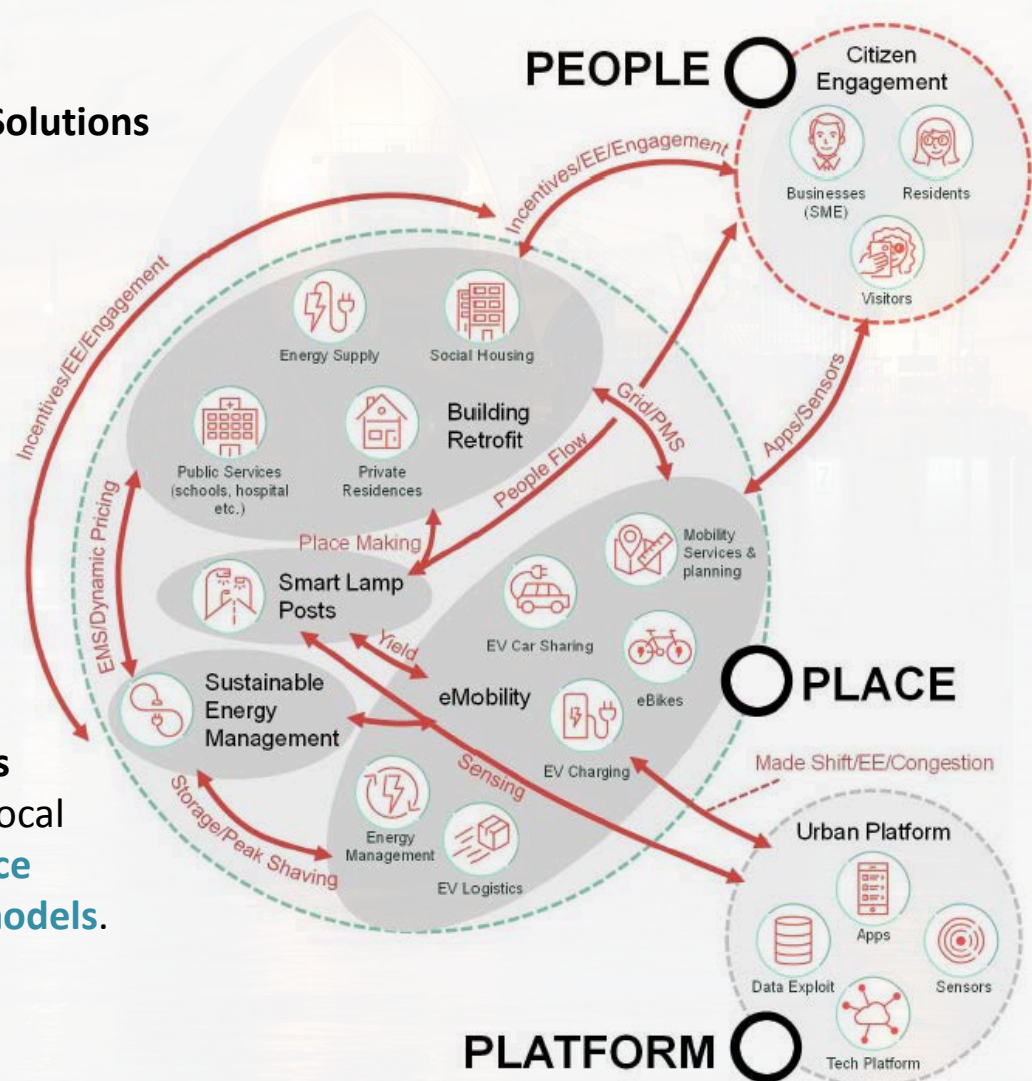

Energy Efficient Cities – towards zero carbon districts

GLA/Greenwich H2020 Bid

Replicable Smart Cities & Communities Solutions
Integrating Energy - Transport - ICT

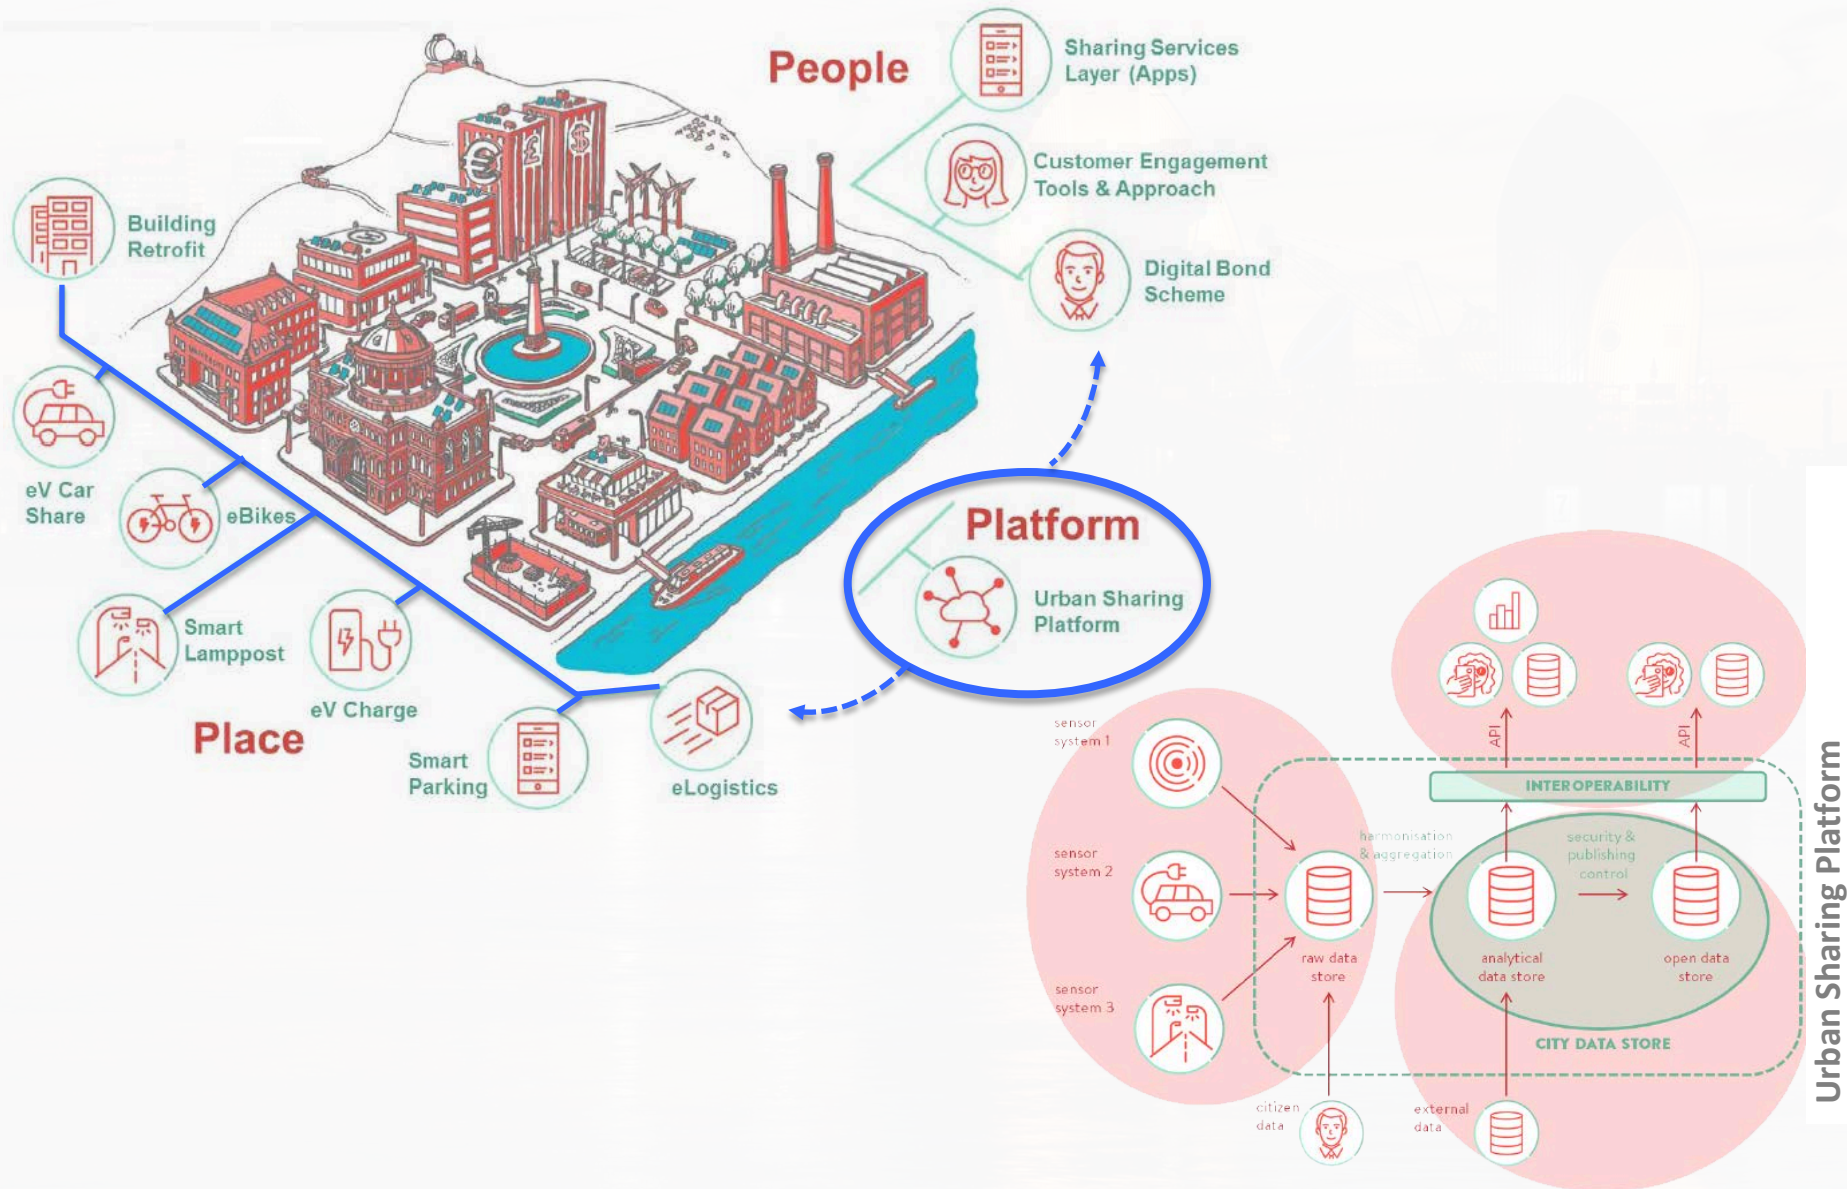

Digital First: technology layer –
data-driven approach, to optimise
cities' existing infrastructure
And deliver the next generation of
public services

Collaborative & Connected Communities
Enhance **Citizen Engagement** and assist local
authorities to adopt **more efficient service
delivery and participative governance models.**

Enhancing the London Datastore – Project 1

Energy Efficient Cities – towards zero carbon districts

SME Platform for Resolving Urban Challenges at the European Level

Create **Digital Cluster** based on **new Emerging Value Chains** to provide **Solutions** to complex **Urban Challenges**.

Wide range of key elements – eg. Data collection, visualisation, analytics systems, IoT, robotics, automation, rapid prototyping – where no one SME provides the complete solution.

Create a **Digital (cloud based) Collaborative Environment** or **Co-creation Space** that facilitates and leverages the co-creative and collaborative potential of different stakeholders involved in value creation and innovation.

Generate a **Digital Platform** that facilitates cross-sectoral & trans-territorial networking by SMEs to ultimately **address the basic needs of the city**

The upshot is a collaboration with London Datastore to create:

- A secure platform, **developed and managed by the Greater London Authority** under the auspices of the **London Data Store** in collaboration with other cities.
- A platform based on **Open, Interoperable Standards** to enable a distributed model to develop as/when partners feel confident/need to.
- The **Space** where **City Stakeholders articulate** their **Challenges/needs**, set out **Priorities** for **Innovation/Transformation** and **Develop Solutions** in the form of **Pilot Demonstrators**.
 - To help drive collaboration between SMEs
 - To provide the business case & evidence to city authorities of the economic case for scale-up or roll out – to create market opportunity

Evolution of the London Datastore

Working towards :

co-creation/co-development of the **LONDON DATASTORE 2.0**

(London Data Store – today)

A library of **static data sets**

(The Future of the London Data Store)

Co-creation Space where **Real-time data** is collected and integrated, informed by predictive analytic systems, and **open to all city stakeholders**

A **Smarter**, more **Sustainable**, **Resilient** & **Resource-Efficient** London

Thank you

Lola Fernandez-Redondo

Sustainable Development adviser @ Digitalgreenwich
Smart Cities Coordinator @ Royal Borough of Greenwich

Transparency and Open data

Cabinet Office

lawrence.hopper@cabinetoffice.gov.uk

The Shakespeare Review
(2013) recommended
‘twin track’ publishing the
most important data with
higher quality

NII emerged from user needs, who identified obstacles to use of open data:

- Key data hard to find
- No standards applied to the data
- No reliability on publication schedules
- Lack of APIs

The NII is the result of a four month discovery process

Launched in March 2015

3 exemplars - Health, Transport and Environment

Identified their NII based on the new principles
and helped us test the implementation document

The NII uses two types of categories to identify data:

- **Core data:** data that defines something in a domain, without it, you could not explore a domain accurately (e.g. location)
- **Subject data:** data that provides further attributes of the thing being identified (e.g. cost, types of equipment)

Hospitals

Published by NHS Choices. Licensed under **OGGL** Open Government Licence.

Openness rating: ★★★★★

This report contains information about hospitals in England. NHS Choices considers hospitals as local services.

DATA RESOURCES (2)

Do More With This Data

- [Share your app »](#)
- [Request new data »](#)

The information on this page (the dataset metadata) is also available in JSON format.

- [API: /api/2/rest/package/hospitals_](#)
- [Read more about this site's CKAN API »](#)

Next steps on NII

- Work with other departments to iterate and populate the NII
- Fully deploy data API across all datasets
- Provide resolvable registry for vocabularies (linked data)

Borough Data Partnership

Meeting #3

22/5/15

GREATERLONDONAUTHORITY

A photograph of the London skyline featuring the Shard and the City Hall. The Shard is a tall, glass-clad skyscraper that tapers to a point, dominating the right side of the image. To its left is the City Hall, a modern building with a distinctive, rounded, glass-clad design. Other modern buildings are visible in the background. The scene is set against a blue sky with scattered white clouds. In the foreground, there is a body of water, likely the River Thames, with a small boat visible. The text "Everyone loves a sharer!" is overlaid in large, white, bold letters across the upper portion of the image.

Everyone loves a sharer!

GLAINTELLIGENCE DEMOGRAPHY

Clicking on a borough on the map will:

- * Change the population pyramid to represent that borough - from there you can change the projection and the year.
- * Show components of change and total population for all three projection sets - from there you can select which component and projection to view.
- * Allow you to view the ward map and associated projections and data.

- Projection
- ☒ SHLAA-capped
 - ☐ Trend-central
 - ☐ ZeroDev-capped

Year
< 2013

- Component
- ☒ Births
 - ☐ Deaths
 - ☐ Total Population

- Projection
- ☒ SHLAA-capped
 - ☒ Trend-central
 - ☒ ZeroDev-capped

Demographic projections & School rolls

LFB borough stats pack

Created 118 days ago

This annual snapshot provides data by borough for the activities of the London Fire Brigade (LFB). The snapshot includes key numbers (like stations, fire engines) as well as different incidents types. The data is presented in Instant Atlas format which allows comparisons between boroughs as well as showing an annual data over time for different items. Monthly borough data for incidents attended by the LFB is available [here](#)

London Transparency data

- **DCLG published Local Government Transparency Code in May 2014** (amended in Feb to inc. housing stock)

[illegible]

November 2014

London Transparency data

- **DCLG published Local Government Transparency Code in May 2014** (amended in Feb to inc. housing stock)

[illegible]

April 2015

- Nov14 = 50% Apr15 = 65%

London Transparency data

- We thought we'd have a go at producing a pan-London dataset!
- Expenditure (>£500):
 - over a billion £ a month
 - max = £ 90 million
 - 31 LBs using one supplier
 - around ½ using GL Fostering/Cranstoun Drug service
 - Top 10:

GLA	DCLG
Transport Trading	Ascham Homes
Elevate East London	Barnet Group
Capita	Veolia
Comensura	Lakehouse contracts

London Transparency data

- **Some issues:**

- a) file formats: xls/csv/pdf
- b) data structure (headers, worksheets, columns)
- c) descriptions used (data dictionary needed)
- d) time period available
- e) naming conventions

- **LGA schemas on how data should be structured:**

<http://transparency.opendata.esd.org.uk/>

- **Will get easier and plan to automate this process by scrapping the data from backend datastores where we can**

but...we'd like us all to share more?

1. What datasets do you already publish? (5mins)

2. What datasets do you think your Chief Exec would like you to publish? (5mins)

3. What datasets you would like to have pan-London? (10 mins)

Vote for your top 3. (5 mins)

What are the benefits/challenges? (5mins)

Practical next steps

- take stock of the information today and feedback to you
- Dig into a few more the popular datasets and understand some of the challenges (licences/standards/timeliness)
- What's already happening in this area? Are there standards we should adopt?
- Further workshops with subject experts
- Political buy-in, senior management and officer level support

Leeds Data Mill

 @LeedsDataMill

DATA 

All about the numbers, our data sets are 100% raw, unprocessed Open Data. We constantly add new data from public, private and third sector providers.

PROJECTS 

A smorgasbord of creativity, technology, science, and wonderment. Explore the projects and prototypes demonstrating Open Data in action.

LEEDS DATA MILL

DASHBOARD 

A great new way to see the value of open data!

COMMUNITY & EVENTS 

A whistle stop tour of the Leeds data scene featuring guest blogs, news, events, announcements and more from us and our friends from across the city.

Not just data!

- **A community focus**
- **How can data improve the lives of citizens and communities?**
- **Steering Group**
- **Education / Challenges / Badges**

Making data real

- **Data is just the raw material**
- **Needs to be understood**
- **Needs to be meaningful**
- **Needs to provide value!**

Data Dives

- **Identify an issue or problem**
- **Which datasets could help?**
- **Work with analysts / developers**
- **Prototype solutions**

Thanks!

Any questions?

The Problem

- The DataStore has 40,000 regular users, but mostly researchers and analysts
- TfL have a community of 400 developers using their live feeds, can we replicate this?
- The Datastore has many datasets that are useful for everyday decisions, but they are not accessible to ordinary Londoners
