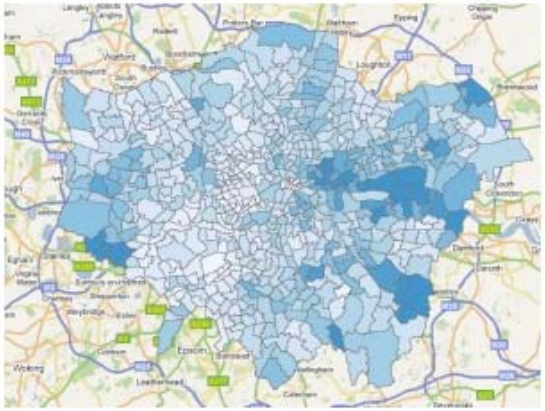
is a Lecturer in Urban Planning at the University of Liverpool

London Data Store Mashup

By ADMIN | *Published:* JANUARY 7, 2010



I have blogged about the newly launched London Data Store elsewhere, however I thought I would post a quick (actually not so quick given our ArcGIS liscence server died today) post about a mashup I created today using the CASA software GMapcreator and website Maptube.

Anyway, you can view the map here – it shows deliberate fire incidents in London.

This entry was posted in *Data*, *London*. Bookmark the *permalink*. *Post a comment* or leave a trackback: *Trackback URL*.

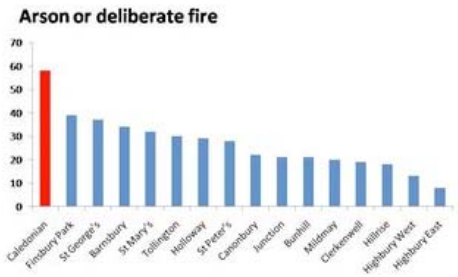
Arson incidents in Islington



The Mayor's office has begun to release some remarkable new data about London in a new website. The first data to be released mainly comes from the emergency services, breaking down details by ward. I beleive that we can use data as a community to drive better public services in the neighbourhood.

I'll be mining this data over coming weeks to see how Caledonian Ward (and others if you feel like it) stack up compared to Islington and wider London.

First up, for no particular reason is arson in common parlance or:

'Count of All Deliberate Fire incidents recorded by the London Fire & Emergency Planning Authority, per month, per ward in London from December 2007 to November 2009.' Original data here.

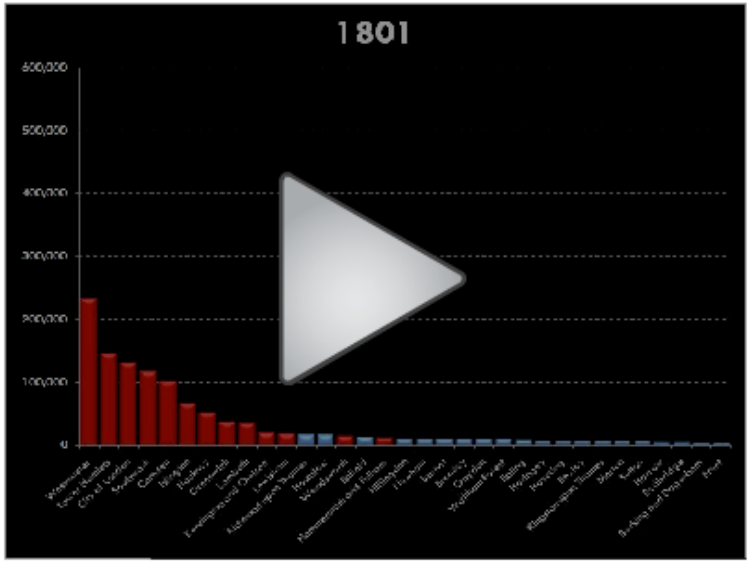
Visualising London Population Growth

Following the theme of the last post - and the last series of posts with video content and animations, this is a short post on the development of London's population, by Borough, from 1801 to 2001. The data is, of course, Crown Copyright - and I downloaded the files from here, in case you want to know. There are a lot of data here, so how to make sense of it? First of all, an animated bar chart sequence, with the original 1963 Inner London Boroughs (i.e. not the ONS definition) in red and the Outer London Boroughs in blue...



You can see it in full size here, to enable reading of label names.

ABOUT ME

ALASDAIR RAE

I work as a Lecturer in the Department of Town and Regional Planning at the University of Sheffield (UK). I'm interested in lots of different areas but mostly things to do with urban policy, planning, GIS, spatial analysis and e-learning. Feel free to contact me if you want to know more about my work.
